

Ankle Brachial Pressure Index (ABPI) Assessment

Relevant for any healthcare professional who may be required to assess the vascular status of an individual. This workshop is designed to build on the learner's knowledge and understanding of diabetes and wound management; giving them ability to further assess the vascular status of an individual to establish or exclude the presence of peripheral arterial disease (PAD).

This workshop includes

- The rationale behind undertaking an ABPI assessment
- The principles of Doppler Ultrasound
- Measuring, calculating and interpreting the ABPI
- Factors affecting the ABPI
- Toe pressures/Toe Brachial Index
- Practical demonstration by the educator

(a HCPC registered podiatrist) who then observes and assists the learners during a practical session (face to face workshops only)

Ankle Brachial Pressure Index (ABPI) Assessment Workshops

For a full summary of the workshop and scheduled dates for face to face and virtual (Zoom) workshops, please visit our website at
<https://www.duetdiabetes.co.uk/hands-on-feet-diabetes-training>

This workshop (for up to 8 learners) will be run at various venues across East Anglia. Alternatively, we can deliver it 'in house' at your place of work, exclusively for your organisation.

Please contact us for more information or if you would like to offer your facilities as a venue for an open workshop.

Due to COVID-19, currently this workshop is only offered as a virtual session (for up to 25 learners).

Each learner will be provided with a delegate pack* and attendance certificates will be sent out after the workshop has taken place.
Complimentary refreshments will be available.

Workshops developed and run by DUET diabetes Ltd comply with current **UK guidelines** and are run by **experienced** healthcare professionals

*For virtual workshops – a copy of the core slides and a 'Top Tips sheet' will be provided electronically.
