

The human foot is a masterpiece of engineering and a work of art – Leonardo da Vinci

Diabetic Foot Awareness for Beauty and Wellness Therapists

Anyone providing foot related treatments (such as Pedicurists and Reflexologists), can be an immensely helpful pair of eyes, ears and hands for clients who live with diabetes...maybe you could be part of the solution to help reduce the 169 diabetes related amputations that take place in England each week (80% are believed to be preventable).

This workshop aims to equip the learner with an understanding of the diabetic foot and the ability to spot the signs of foot problems, thus increasing confidence of:

- When to treat and when to leave alone
- What advice to offer clients with diabetes

For a summary of content of the workshop and scheduled dates for face to face and virtual (Zoom) workshops, please visit our website at www.duetdiabetes.co.uk/hands-on-feet-diabetes-training

This workshop (for up to 12 learners) will be run at various venues across East Anglia. Alternatively, we can deliver it 'in house' at your place of work, exclusively for your organisation.

Due to COVID-19, currently this workshop is only offered as a virtual session (for up to 25 learners).

Each learner will be provided with a delegate pack* and attendance certificates will be sent out after the workshop has taken place.

Complimentary refreshments will be available.

*For virtual workshops – a copy of the slides and a 'useful links/resources/further reading' document will be provided electronically.

Workshops developed and run by DUET diabetes Ltd comply with current UK guidelines and are run by experienced healthcare professionals

Please contact us for more information or if you would like to offer your facilities as a venue for an open workshop
